

Coastal Adaptation and Protection grants 2013-14

Coastal Manager	Project	Description	Grant
Northern Agricultural Catchments Council	Coastal hazard risk management for Guilderton to Jurien Bay	Initiate a strategic and integrated approach to coastal hazard risk management and adaptation planning to support the longer term development of coastal hazard maps and adaptation planning.	\$95,000
City of Wanneroo	Quinns Rocks coastal management	Finalise design and documentation of a coastal management option identified during previous coastal engineering analysis and investigation.	\$50,000
City of Stirling	Beach profile surveying	Continuation of beach profile surveys from Scarborough to Sorrento to inform future coastal planning and management of the city's coast.	\$12,500
Town of Cambridge	City Beach groyne maintenance	Undertake maintenance works on the City Beach groyne so it can continue to help stabilise the town's beaches.	\$120,000
City of Cockburn	Relocation of dual use path at C.Y.O'Connor Reserve	Relocation of a section of dual use path south of Catherine Point to maintain a buffer to erosion in front of the path.	\$50,000
Cockburn Sound Coastal Alliance	Cockburn Sound coastal values, risk assessment and adaptation planning project	Identification of the specific natural and built coastal assets, and initial development of appropriate adaptation strategies to manage coastal hazards of climate change.	\$150,000
City of Busselton	Locke Estate coastal protection works	Refurbishment of the existing Locke Estate coastal protection structures to stabilise the foreshore, addressing ongoing erosion issues in the area.	\$262,500
City of Busselton	Detailed beach and bathymetry survey	Detailed beach and bathymetry survey of a large section of coast to improve understanding of sediment transport in Geographe Bay.	\$65,000
City of Busselton	Sand replenishment	Continuation of sand replenishment to maintain beach amenity and protect infrastructure by reducing erosion of the foreshore reserve.	\$50,000
City of Busselton	Beach monitoring	Development and implementation of a beach monitoring program for Busselton coast including oblique aerial photos, field photos, beach profiles and an update of coastline movement plots.	\$35,000
Shire of Manjimup	Windy Harbour foreshore photo-monitoring	Implementation of a photo-monitoring program to produce a photo set with matching climatic and coastal observations to improve understanding of coastal processes.	\$13,500
City of Albany	Emu Point to Middleton Beach coastal adaptation and protection strategy	Continuation of coastal monitoring and investigations to develop a sustainable long-term management strategy for this section of coast.	\$102,000
Shire of Esperance	Esperance Bay sand replenishment	Continuation of sand replenishment to maintain beach amenity and protect infrastructure by reducing erosion of the foreshore reserve.	\$50,000
Total			\$1,055,500
