- ▲ Existing Telstra Next G[®] Site
- Existing Next G[®] Coverage
- Existing Next G[®] Coverage with External Antenna
- Proposed RMCP Site
- Proposed RMCP Coverage Planned for 2012
- Proposed RMCP Coverage with External Antenna Planned for 2012
- Proposed RMCP Coverage planned beyond 2012, timing to be confirmed
- Proposed RMCP Coverage with External Antenna planned beyond 2012, timing to be confirmed

Customers should be aware that the Telstra mobile coverage maps displayed have been created using tools that predict the likely areas of coverage. Not every particular location within the identified coverage areas has been individually tested for coverage. This means that while the footprint of coverage outlined on the maps is generally accurate, there will be specific areas described as being within a coverage area where a customer's mobile phone will not work. This is a common characteristic of wireless systems. For example, coverage could be degraded or not exist in specific locations due to certain physical structures or geographic features. Physical structures which may block or inhibit coverage could include basements, lifts, underground car parks, concrete buildings, tunnels and road cuttings. Geographic features which may block or inhibit coverage could include formations such as hills and mountains or even trees.

Data speeds experienced on Telstra's mobile networks may be affected by network availability, the type and configuration of customer equipment, the performance of external networks (for example the Internet), the signal strength of the device used and other factors such as the type of application being used.

* Proposed RMCP coverage reflects Telstra's best estimate of indicative coverage based on likely siting and configuration of new base stations which will only be confirmed once the new sites are acquired. Actual coverage will be subject to confirmation of exact site location and equipment configuration within the site, especially the precise location of new towers in relation to the local terrain.
